

This is a fairly simple bowling game. There are ten rounds, and an obstacle is added every round. The goal is to avoid the obstacles and knock down as many pins as possible. If you hit an obstacle, you will move onto the next round without scoring any points.

Controls:

Press W to launch the ball from the position it is currently at. Then, use A and D to move the ball left and right to avoid the obstacles and score. Be careful, because if your ball is already moving to the left, it will be harder to move to the right, and vice versa.
